50 70
AKA type 15 × 30

70°C 50°C
DKA75 75°C
DKA type 15 × 30

70 80
AM type 10 × 10

TW70
TW type φ 18

70 75 AMD
AMD type 12 × 30

Special Order

Please ask about a size and combination of a color

- ### Notes upon using Thermo Colour Sensor
- (1) Please store the products in a cool and dark place before use.
 - (2) Please do not use the product in liquid (water, oil, etc.).
 - (3) Please remove the paper behind the label and affix the label after wiping dirt, oil, etc. from the place to affix.
 - (4) The number on the glow place shows the glow temperature.
 - (5) Although the colour comes out lightly before the set temperature, the colour comes out clearly at the set temperature.
 - (6) Please do not change the shape of the product or cutting it with scissors.
 - (7) Please do not scratch and rub the product hard.
 - (8) Please affix the product on a flat surface.
 - (9) Although the reversible product glows by ± 2°C when the temperature increases, the product goes back to the original colour at the lower temperature than the set temperature by approx. 15°C due to hysteresis.

※ Please don't hesitate to ask to the following sales department, if you have any question and request

Asey Industry Co., Ltd

Postcode 243-0201

※ Because a color of a product is printed matter, there is a different case with a real color slightly
 ※ A design and price have a case to change without a notice for improvement
